

ASSIGNMENT · WEEK 1

MY AI LANDSCAPE REPORT

Map the AI tools that matter in your field — 12 tools across 6 categories, each with what it does, how it works, who it's for, and how Claude compares. A research task, not a quiz.

THE TASK

Research and document **12 AI tools across 6 categories** relevant to your field. For each: **what it does**, **how it works** (high level), **who it's best for**, and **how Claude compares**. Include one **surprising use case** per category.

HOW TO DO IT

- 1 Pick **6 categories** that matter in *your* field.
- 2 Choose **2 tools** per category (12 total).
- 3 Research each with **Perplexity / official docs**; fill What / How / Who / vs Claude.
- 4 Add one **surprising use case** per category.
- 5 Assemble as a shareable **PDF or Notion** doc; keep your sources.

HINTS

- Pick categories tied to **your field**, not generic ones.
- Keep “how it works” **high level** — no jargon, one plain line.
- Compare Claude **fairly** — where it wins and where another tool does.
- Every claim needs a **source**; never invent a feature.
- One **surprising use case** per category — the non-obvious win.

START HERE – EVERY TOOL CARD ANSWERS

#	FIELD	FILL IT IN (PER TOOL)
1	What	<i>what it does, one plain line...</i>
2	How	<i>how it works, high level, no jargon...</i>
3	Who	<i>who it's best for...</i>
4	vs Claude	<i>how Claude compares for the same job...</i>

YOUR 6 CATEGORIES (2 TOOLS EACH = 12)

- 1 *category + 2 tools + a surprising use case...*
- 2 ...
- 3 ... (continue to 6)

WHAT TO SUBMIT

A structured, shareable **PDF or Notion document** — 6 categories, 12 tool cards, a surprising use case per category, **with sources**. This is your **Week 1 deliverable** (feeds Week 2). **~60–75 min.**

YOU'RE DONE WHEN

- ☐ 6 categories, 12 tool cards (What / How / Who / vs Claude on each).
- ☐ A surprising use case per category, with sources — one shareable PDF/Notion doc.
