

GEN AI KICKSTARTER · PROJECT 02

SOLUTION

Study Planner Agent

A daily study assistant tuned to your subjects, your exam dates, and the way you actually learn.

Day 7 · Claude Projects

Reference build — yours can differ.

Study Planner Agent

How it's executed

THE EXECUTION — HOW, WHERE & WHEN

Everything hinges on the Project's instructions — the system prompt. You create a Project, write a coach persona loaded with your real constraints, and add your syllabus as knowledge. From then on, every chat in that Project inherits the setup, so "What's today's plan?" returns something tailored without re-explaining anything. Each day you report progress and it re-balances; each week a review chat quizzes you. Setup is ~15 minutes; daily use is one message.

WHAT TOOLS — AND THEIR ROLE

Claude Projects	Persistent space: instructions + knowledge + chats in one place
Project instructions	The system prompt that encodes your reality once, for every chat
Project knowledge	Your syllabus and notes the coach reads from

TOOL OVERVIEW

What you'll find *where*

Claude — Projects

Projects (left sidebar)	" + New project " makes a reusable, named space; open it to work inside it
Set instructions	The Project's system prompt — persona, rules, your constraints; applies to every chat
Add knowledge / files	Upload syllabus, notes, past papers; the coach answers from them
Chats	Each day's plan is a chat inside the Project; all inherit the instructions

MAKE IT REUSABLE

Connect it & automate it

The build is worth more when it plugs into your real tools and runs itself. Here's exactly where to click.

CONNECT A CONNECTOR

Where: Customize → Connectors (or "+" in the message box → Connectors → Manage)

- 1 Pick the app from the directory — Google Drive, Gmail, Notion and more.
- 2 Click Connect and approve in the app's own sign-in window (OAuth).
- 3 Grant the least access it needs; you can turn it on per chat.
- 4 In a chat, toggle it on and ask Claude to use it.

For this project: Connect Google Drive to pull your syllabus, and your calendar so the plan respects real commitments.

Claude never sees your password — and it never sends or changes anything until you say yes.

CREATE A SKILL

Where: Customize → Skills · in Cowork: "+" → Record a skill

- 1 Record: "+" → Record a skill → do the task once → Save — Claude writes the SKILL.md for you.
- 2 Or write it: a SKILL.md with a name, a one-line description (that's the trigger), and 5–8 rules.
- 3 Zip the folder (folder as the root) → Customize → Skills → Upload → enable.
- 4 Run it with /your-skill; edit and re-upload to improve it.

For this project: Save the coach instructions as /study-coach so you can reuse it across subjects and terms.

A Skill is a saved recipe Claude reloads every time — so you never re-explain.

PROMPT LIBRARY · STAR

Write it in *STAR*

STAR = Situation · Task · Action · Result. Same four parts every time — start at your level and add detail as you climb.

BASIC

- S** **Situation.** I have exams coming up.
- T** **Task.** Give me a study plan.
- A** **Action.** Spread my subjects across the next two weeks.
- R** **Result.** A simple day-by-day list.

INTERMEDIATE

- S** **Situation.** I study [subjects]; my exam is [date]; I have [n] hrs on weekdays.
- T** **Task.** Build a plan to the exam.
- A** **Action.** Balance subjects and put harder topics earlier.
- R** **Result.** A dated plan (today → exam) with daily tasks.

ADVANCED

- S** **Situation.** Exam [date]; 3 hrs weekdays / 5 weekends; I use active recall and I avoid Physics.
- T** **Task.** Coach me to the exam and keep me honest.
- A** **Action.** Weight by difficulty, front-load Physics in small doses, never overload a day.
- R** **Result.** A dated plan where each day ends with 5 recall questions.

PRO

- S** **Situation.** I want a coach that runs weekly inside my Study Project.
- T** **Task.** Re-plan each week from my real progress.
- A** **Action.** Quiz me on last week (10 recall Qs), find weak spots, re-weight the coming week, respect exam dates.
- R** **Result.** A weekly review + updated plan. (Save the instructions as /study-coach.)

WHY IT MATTERS

Where this pays off *in real life*

This isn't a toy exercise. The same build, pointed at real work, does this:

- ✓ Exam and certification prep
- ✓ Learning a new skill on a deadline
- ✓ Onboarding into a new job or tool
- ✓ Any structured, multi-week goal
- ✓ Coaching a team through a curriculum

WHAT GREAT LOOKS LIKE

- ✓ The plan reaches the real exam date and is weighted by difficulty
- ✓ It adapts when you fall behind instead of repeating itself
- ✓ Days end with active recall, not just reading
