GEN AI KICKSTARTER · PROJECT 03

SOLUTION

Content Engine

Posts, captions, thumbnails, and scripts — on autopilot, and still sounding like you.

Day 9 · Claude · Canva AI

Reference build — yours can differ.

Content Engine

How it's executed

THE EXECUTION — HOW, WHERE & WHEN

You separate words from visuals. First you capture your voice in a short profile and feed it into a single Claude prompt that returns a complete content set per topic — batch seven topics, get a week. Then Canva AI turns each hook into a thumbnail; duplicating one template keeps the week visually consistent. Finally you assemble captions, scripts, and images into a schedulable pack. Turning the voice profile into a Claude Skill makes every future run automatic.

WHAT TOOLS — AND THEIR ROLE

Claude	Generates hooks, captions, hashtags, scripts in your voice; holds the voice as a Skill
Canva AI (Magic Studio)	Text-to-image thumbnails, templates, Brand Kit for consistency
Voice profile	The reusable spec that keeps everything sounding like you

TOOL OVERVIEW

What you'll find *where*

Claude

Chat / prompt	Paste the voice profile + topics; get full content sets back
Skills	Save the voice profile as a Skill so it loads on every content chat
Projects	Keep a "Content" Project with the profile as knowledge

Canva AI

Create a design	Pick a size (1080×1080 posts, 1080×1920 stories)
Magic Media (text-to-image)	Type the hook as a prompt to generate a thumbnail
Brand Kit	Lock your fonts and colours so every graphic matches
Templates + Magic Resize	Duplicate one template; resize to every platform in a click

MAKE IT REUSABLE

Connect it & automate it

The build is worth more when it plugs into your real tools and runs itself. Here's exactly where to click.

CREATE A SKILL

Where: Customize → Skills · in Cowork: "+" → Record a skill

- 1 Record: "+" → Record a skill → do the task once → Save — Claude writes the SKILL.md for you.
- 2 Or write it: a SKILL.md with a name, a one-line description (that's the trigger), and 5–8 rules.
- 3 Zip the folder (folder as the root) → Customize → Skills → Upload → enable.
- 4 Run it with /your-skill; edit and re-upload to improve it.

For this project: Save your voice profile as /brand-voice so every content chat writes in your voice automatically.

A Skill is a saved recipe Claude reloads every time — so you never re-explain.

CONNECT A CONNECTOR

Where: Customize → Connectors (or "+" in the message box → Connectors → Manage)

- 1 Pick the app from the directory — Google Drive, Gmail, Notion and more.
- 2 Click Connect and approve in the app's own sign-in window (OAuth).
- 3 Grant the least access it needs; you can turn it on per chat.
- 4 In a chat, toggle it on and ask Claude to use it.

For this project: Connect Google Drive (or a scheduler) to drop finished posts where you publish from.

Claude never sees your password — and it never sends or changes anything until you say yes.

PROMPT LIBRARY · STAR

Write it in **STAR**

STAR = Situation · Task · Action · Result. Same four parts every time — start at your level and add detail as you climb.

BASIC

- S Situation.** I post about [topic].
- T Task.** Write some captions.
- A Action.** Keep them short and friendly.
- R Result.** 5 captions.

INTERMEDIATE

- S Situation.** I'm a creator in [niche]; today's topic is [topic].
- T Task.** Give me a full post.
- A Action.** Write a hook, a caption, hashtags, and a short script.
- R Result.** Hook (≤12 words), caption (≤120 words), 5 hashtags, a 30s script.

ADVANCED

- S Situation.** Here's my voice profile [paste]; I have 7 topics for the week.
- T Task.** Produce a week of content in my voice.
- A Action.** Per topic: hook + caption + 5 niche hashtags + a 35s script with [B-roll] cues; never use my banned words.
- R Result.** 7 complete, numbered content sets.

PRO

- S Situation.** My voice lives in a Skill; I batch weekly and make thumbnails in Canva.
- T Task.** Produce the words and the thumbnail brief together.
- A Action.** Load /brand-voice; per topic output the set + a one-line Canva Magic Media prompt built from the hook.
- R Result.** 7 sets + 7 thumbnail prompts, numbered for scheduling.

WHY IT MATTERS

Where this pays off *in real life*

This isn't a toy exercise. The same build, pointed at real work, does this:

- ✓ Founder and personal-brand content
- ✓ Marketing for a small business
- ✓ Course or community promotion
- ✓ Client social media as a service
- ✓ Consistent posting without burnout

WHAT GREAT LOOKS LIKE

- ✓ Seven complete sets from a single run
- ✓ It reads like you wrote it, not a bot
- ✓ Thumbnails share one template and read at a glance
