

GEN AI KICKSTARTER · PROJECT 04

SOLUTION

Automation Suite — Idea Stress-Test

Stress-test any idea — market, competition, ICP — in a single Claude run, with citations you can trust.

Day 10 · Claude · Cowork

Reference build — yours can differ.

Automation Suite — Idea Stress-Test

How it's executed

THE EXECUTION — HOW, WHERE & WHEN

You use Cowork as an autonomous analyst. You describe the idea, hand it a fixed report structure, and require web-cited evidence for every external claim. Cowork searches, synthesises, and returns a decision-ready document. You save the instruction set as a Skill so the same rigour applies to any future idea in one run, and you can schedule it to re-check your top idea monthly. Two ideas run through the identical template become directly comparable.

WHAT TOOLS — AND THEIR ROLE

Claude Cowork	Runs the multi-step research task in the cloud; searches the web; outputs files
Web search	Keeps market data and competitors current and citable
Skills + Scheduled tasks	Make the stress-test reusable and recurring

TOOL OVERVIEW

What you'll find *where*

Claude Cowork

Start a task	Describe the idea; Cowork plans and executes multi-step work
Web search / research	Pulls current market and competitor data with sources
Files / outputs	Delivers the report as a downloadable document
Skills	Save the stress-test as a reusable Skill: idea in → report out
Scheduled tasks	Re-run the check on a cadence (e.g. monthly) automatically

MAKE IT REUSABLE

Connect it & automate it

The build is worth more when it plugs into your real tools and runs itself. Here's exactly where to click.

CONNECT A CONNECTOR

Where: Customize → Connectors (or "+" in the message box → Connectors → Manage)

- 1 Pick the app from the directory — Google Drive, Gmail, Notion and more.
- 2 Click Connect and approve in the app's own sign-in window (OAuth).
- 3 Grant the least access it needs; you can turn it on per chat.
- 4 In a chat, toggle it on and ask Claude to use it.

For this project: Connect Notion or Google Drive so each report lands where your team already works.

Claude never sees your password — and it never sends or changes anything until you say yes.

CREATE A SKILL

Where: Customize → Skills · in Cowork: "+" → Record a skill

- 1 Record: "+" → Record a skill → do the task once → Save — Claude writes the SKILL.md for you.
- 2 Or write it: a SKILL.md with a name, a one-line description (that's the trigger), and 5–8 rules.
- 3 Zip the folder (folder as the root) → Customize → Skills → Upload → enable.
- 4 Run it with /your-skill; edit and re-upload to improve it.

For this project: Save the report instructions as /idea-stress-test — idea in, the same report out.

A Skill is a saved recipe Claude reloads every time — so you never re-explain.

MAKE A SCHEDULE

Where: Cowork → Scheduled tasks (or just ask Claude to "schedule this")

- 1 Set up the task once — the exact prompt it should run.
- 2 Scheduled tasks → New → paste the task and pick a cadence (e.g. Monday 9am, or one-off).
- 3 Save — it runs in the cloud and messages you with the result.
- 4 Turn on automatic approval if it should run while you're away.

For this project: Schedule /idea-stress-test to re-run monthly on your top idea and flag what changed.

Like a recurring alarm that does the work — not just one that rings.

PROMPT LIBRARY · STAR

Write it in *STAR*

STAR = Situation · Task · Action · Result. Same four parts every time — start at your level and add detail as you climb.

BASIC

- S Situation.** I have a business idea: [idea].
- T Task.** Tell me if it's any good.
- A Action.** Weigh the main pros and cons.
- R Result.** A short verdict.

INTERMEDIATE

- S Situation.** I'm validating [idea] before building.
- T Task.** Pressure-test it.
- A Action.** Cover market, top competitors, ideal customer, and risks.
- R Result.** A structured summary with a go / no-go.

ADVANCED

- S Situation.** [idea] — and I want evidence, not opinion.
- T Task.** Produce a validation report I can trust.
- A Action.** Use web search; cover market signals, top 5 competitors + the gap, ICP, and top 3 risks; cite every external claim as [n]; be honest, not optimistic.
- R Result.** A decision-ready report ending in a clear go / no-go.

PRO

- S Situation.** I stress-test many ideas and want it repeatable and current.
- T Task.** Run the same rigorous check on any idea, on a schedule.
- A Action.** Save as a Skill; per idea run web-cited research + "what would have to be true"; schedule a monthly re-run that flags changes.
- R Result.** A saved report file per idea + a monthly update. (Save as /idea-stress-test.)

WHY IT MATTERS

Where this pays off *in real life*

This isn't a toy exercise. The same build, pointed at real work, does this:

- ✓ Validating a startup or side-project idea
- ✓ Choosing between two product bets
- ✓ Assessing a new market or region
- ✓ Competitive analysis before a launch
- ✓ Investment or partnership due diligence

WHAT GREAT LOOKS LIKE

- ✓ Numbers are current and cited, not guessed
- ✓ Competitors are named with the gap spelled out
- ✓ It commits to a real go/no-go — not a maybe
