

ASSIGNMENT 1 · SESSION 1

MY AI WORKFLOW MAP

Turn three things you do every week into AI-assisted workflows — and map them on a single page. This is a build task, not a quiz: you are designing your own system.

THE TASK

Identify **3 tasks you do repeatedly**. For each one, write the process you follow **today**, then redesign it with Claude in the loop as **Input → Process → Output → Action**. Estimate the **time saved per week**, and draw all three as **one workflow map**.

HOW TO DO IT

- 1 Pick **3 real, recurring tasks** — things you do weekly that eat time (replying to emails, weekly reports, research, scheduling).
- 2 For each, write the **current process**: the manual steps exactly as you do them now.
- 3 Redesign each with Claude in the loop as **Input → Process → Output → Action** — what goes in, what Claude does, what comes out, what you do with it.
- 4 Estimate the **weekly time saved** — honest before vs after, in minutes.
- 5 Draw all three as **one map** and build it as a **Claude Artifact**.

HINTS

- Use the **CLEAR** checklist for the Claude step — Context, Length, Examples, Audience, Result.
- Choose tasks that **repeat**. A one-off does not belong on a workflow map.
- Mark where Claude should **not act alone** — no live data, no memory, needs your judgement — and add a human-check step there.
- Think in **systems, not single prompts**: what triggers it, what it produces, what happens next.
- Be honest on time saved — a believable **20 min/week** beats an invented 5 hours.

START HERE — FILL ONE ROW PER TASK

#	TASK	CURRENT PROCESS (TODAY)	WITH CLAUDE — INPUT → PROCESS → OUTPUT → ACTION	TIME SAVED / WEEK
1	your task...	how you do it now...	I → P → O → A...	— min
2				
3				

WHAT TO SUBMIT

A **Claude Artifact** — a 1-page workflow map with all **3 tasks** documented and an **estimated weekly time saving**. Share the Artifact link (or export a PDF) to the Menler LMS. **~60 min**.

YOU'RE DONE WHEN

- ☐ 3 recurring tasks, each with today's process and the Claude-in-the-loop version (I → P → O → A).
- ☐ A weekly time saving for each, and all three on one map, built as an Artifact.
