

ASSIGNMENT 1 · SESSION 2

CONNECTED CLAUDE WORKSPACE

Build one real Claude Project that knows who it is, has your rules and your documents, and one app plugged in — then run three real tasks through it. A build task, not a quiz.

THE TASK

Build **one Claude Project** with: a **150+ word system prompt** (who Claude is, your domain, the default output format, what to never do), at least **one Skill** attached, one **knowledge document** uploaded, and one **Connector** enabled. Then run **3 real tasks** through it — no tab-switching, no copy-paste.

HOW TO DO IT

- 1 Left strip → **Projects** → New project → name it for one area of your work.
- 2 Write a **150+ word system prompt**: who Claude is, your field + audience, the default answer format, and the hard “never do” lines.
- 3 Attach a **Skill** and **upload** one real knowledge document.
- 4 Turn on one **Connector** (Customize → Connectors) you’ll actually use.
- 5 Run **3 real tasks inside the Project**; save a Setup Summary as a **Claude Artifact**.

HINTS

- System prompt = four parts: **Who · Domain · Format · Never**. Vague in, vague out.
- Attach a Skill you will **actually use** (a house-style or report skill), not just for show.
- Upload one real doc and tell Claude: “**use this; don’t invent** facts or prices.”
- Turn on just **one** Connector, least access — Claude never sees your password.
- Do the 3 tasks **inside the Project**, not a blank chat — that’s the whole point.

START HERE – YOUR PROJECT CHECKLIST

#	INGREDIENT	WHAT IT NEEDS	YOURS
1	System prompt	150+ words — who / domain / format / never	yours...
2	A Skill	at least one, and actually used	/...
3	A knowledge doc	one uploaded; answers use it	...
4	A Connector	one enabled and used	...

THEN RUN 3 TASKS INSIDE IT (WRITE EACH IN STAR)

- 1 *Situation · Task · Action · Result...*
- 2 ...
- 3 ...

WHAT TO SUBMIT

A **Claude Artifact** — a Project Setup Summary: your **system prompt + skill rules + connector used + 3 task results**. Share the Artifact link (or export a PDF) to the Menler LMS. This is **Portfolio asset #2**. ~60 min.

YOU’RE DONE WHEN

- ☐ One Project with a 150+ word system prompt, a Skill, a knowledge doc and a Connector.
- ☐ 3 real tasks run **inside** the Project, and a Setup Summary saved as an Artifact.
