

ASSIGNMENT 1 · SESSION 4

YOUR AI CAPSTONE

Build one AI-powered solution to a real problem — Claude at the core plus two other tools — usable by someone else, live at a public link, and demoable in 3 minutes. A build task, not a quiz.

THE TASK

Build **one AI-powered solution** to a **real** problem, with **Claude at the core** and at least **two other program tools**. It must be **usable by someone else**, shareable via a **public URL**, and demonstrable in **3 minutes**.

Judged on specificity and real-world use, not complexity.

HOW TO DO IT

- 1 Pick one **real, specific problem** for a named user.
- 2 Build it with **Claude at the core** + 2 other tools (Projects, Skills, Automations, or a builder).
- 3 Make it **usable** and publish to a **public URL**.
- 4 Record a **90-second live Loom**: problem → Claude → output.
- 5 Write a **300-word brief** and post on **LinkedIn** within 48 hours.

HINTS

- Be **specific** — one real, named problem beats a generic “AI app for everything.”
- Claude at the **core**, not bolted on the side.
- Make it **usable by someone else** — a public link anyone can open.
- The demo must **show** live output, not just tell.
- Keep every claim **honest** — never fake a result or a testimonial.

START HERE – YOUR CAPSTONE IN 4 LINES

#	PART	FILL IT IN
1	Problem	<i>the real, specific problem...</i>
2	Users	<i>who actually uses it (a named person/group)...</i>
3	Claude	<i>what Claude does at the core...</i>
4	Proof	<i>how you show it works in 3 min...</i>

THEN HAND IN FOUR PIECES (WITHIN 48 HOURS)

- 1 *Public URL (Notion / Gamma / Artifact / Lovable / GitHub)...*
- 2 *90-second live Loom + 300-word brief...*
- 3 *LinkedIn post...*

WHAT TO SUBMIT

A **public URL** + a **90-second Loom** (live demo only) + a **300-word brief** + a **LinkedIn post**, within 48 hours. Share to the Menler LMS. This is **Portfolio asset #4 — your capstone. ~90 min.**

YOU'RE DONE WHEN

- ☐ One real solution — Claude at the core + 2 tools — usable by someone else at a public URL.
- ☐ A 90-second live demo, a 300-word brief and a LinkedIn post, all within 48 hours.
